

## INGLES

### Nature house

Pikukoborda is a natural house. Know that means? READ +

NATURE HOUSE is a portal designed to attract people to nature. Rural houses located in the middle of nature, away from the crowds, large urban centers and holiday centers.

As I define, "far from civilization but close to it."

The accesses to the house are in perfect condition and in a geographically very privileged area.

They are houses for all those people who want to disconnect and relax in a natural environment, feeling the tranquility of nature, enjoying the scenery and listening to the little birds! Such is the case at Pikukoborda.

As a tenant you also contribute to a greener planet: for every night of reserved accommodation, we plant a tree. Our ultimate goal is to have planted at least 1 million trees by 2021.

Not only that, in the rural houses ecological products of homemade and / or local elaboration are offered, such as jams, cheese, honey and products from the garden.

In the apartments you will find different containers for recycling plastic, paper and glass, as well as a container for the organic, which is deposited in the compost bin in the garden. Eco-friendly soaps are also used for dishes and the washing machine.

Our concept is to attract people who share this philosophy !!

THANKS AND WELCOME !!!
